DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 33 is rejected under 35 U.S.C. 102(e) as being anticipated by US patent No. 6,162,686 to Huang et al.

Huang et al. teaches a semiconductor device (Fig. 5) comprising:

a first insulating film (24, 30) formed on a substrate;

a first conductor (26, 38B) on the substrate and extending through the first insulating film;

a first upper wire (58B) on first insulating film and first conductor; and

a second insulating film (66) on the first upper wire, wherein the second insulating film includes a thin area that can be used for guiding a laser.

Allowable Subject Matter

3. Claims 1, 2, 5 – 23, 30 – 32, 36 – 44 are allowed.
4. Claims 34 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach a semiconductor device wherein the first conductor has a first portion made of a first material and a second portion made of material different from the first material (Figs. 11B, 11C, 12B, 12C).

Response to Arguments

6. Applicant's arguments filed April 3, 2003 have been fully considered but they are not persuasive.

The Applicant argues that Huang et al. does not teach a first conductor formed on a semiconductor substrate. This feature can be seen in figure 5, wherein the conductor (26, 38B) is formed on the semiconductor substrate (10). While not being in direct contact with the substrate, the conductor is indeed on the substrate, just as the wire (58B) and second insulating film (66) are on the substrate. Similarly, a coaster can be placed on a table, with a drinking glass on top of the coaster. The drinking glass would still be on the table, although the coaster is between the bottom surface of the drinking glass and the upper surface of the table.

The Applicant has corrected assumed that the intention of the previous office action was to object to claim 34, which depends from rejected base claim 33. Claim 43 has been allowed, since it depends from an allowed base claim.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
